Profile

I am a passionate pianist, composer, arranger, recording artist, and teacher. I am flexible, and can compose in a wide variety of styles. I understand that music is a higher form of communication to lift, bless, teach, and inspire.

Experience

- Taught Private piano and theory lessons via online video conferencing to students of all ages beginning in 2011.
 - Collaboratively composed, recorded, mixed, and mastered music in a wide variety of styles for both performance and commercial applications, including product videos for ICON Health and Fitness, the game "Redneck Bounce" for iOS, and music for a full-length documentary by LumaCraft Media, LLC.
 - Taught Master classes as a guest at The Maryland Conservatory of Music to students ages 7 - 18.
 - Taught private piano, theory, production and composition lessons using video conferencing since 2011 to students of all ages. Students have won competitions for composition work, including the Reflections competition.
 - Performed complete professional editing, post-production, and mastering for four albums now available for purchase on over 30 stores since 2009.
 - Collaborated with other student programmers on an interactive music visualizer in which the music is analyzed in real-time using a Fast-Fourier Transform function, and colors and shapes move based on frequency, rhythm, and dynamics. The color scheme used changes depends on the time of day the piece is played. All Synthesizers were created and music created in Logic Pro X from scratch. I then used an Integrated Developer Environment called Processing to write the interactive visualizer in JavaScript.
 - Given complete musical and technical demonstrations of equipment from Roland — including digital pianos, audio interfaces, and handheld recording devices.
 - Demonstrated professional music creation software from Apple, leading to purchases.
 - Collaboratively composed, recorded, mixed, and mastered music in a wide variety of styles for both performance and commercial applications, including product videos for ICON Health and Fitness, the game "Redneck Bounce" for iOS, and music for a full-length documentary by LumaCraft Media, LLC. .
 - Performed complete professional editing, post-production, and mastering for four albums now available for purchase on over 30 stores since 2009.
-

-
- Worked as a member of the Computer Music Staff at the Peabody Conservatory of Music at Johns Hopkins University to help maintain and improve the user experience of five professional studios by testing equipment, reconfiguring the layout of the studios, and developing software as a replacement for hardware interfaces to aid those with visual impairments; evaluating user interface, and teaching the use of the equipment.
 - Single-handedly restored Mac hardware and software systems on six units simultaneously and received training directly from Apple to provide technical support for macOS. Competent on all three major desktop computing platforms—Windows, macOS, and Linux. Trained and used all versions of macOS for 21 years.

Skills

- Personable, empathetic.
- Asks good questions
- Good listener
- Problem-solver (esp. with technology)
- Analytical, goal-driven
- Self-starter
- Very perseverant and persistent
- Fluent in Mandarin Chinese (spoken & listening)
- Excellent verbal and written communication skills.
- Able to work with customers with disabilities (understand the relationship between technology and human interface).

Work History

Graduate Assistant, Johns Hopkins University (12/18 - 5/20): Worked as a member of the Computer Music Staff at the Peabody Conservatory of Music at Johns Hopkins University to help maintain and improve the user experience of five professional studios by testing equipment, reconfiguring the layout of the studios, and developing software as a replacement for hardware interfaces to aid those with visual impairments; evaluating user interface, and teaching the use of the equipment.

Freelance Composer, LumaCraft, LLC (12/19 - 6/20): Composed, mixed, and mastered music for two product videos, each requiring a different style of music (one electronic and the other, orchestral)

Freelance Composer, ICON Health and Fitness (1/18 - 3/18): Composed, mixed, and mastered music for two product videos, each requiring a different style of music (one electronic and the other, orchestral)

Instructor of Music Theory, Composition, & Scoring, Maryland Conservatory of Music (9/18 - Present): I provide weekly private instruction to youth in music theory, conventions in music notation, and the principles of composition preparatory to the study of music at the collegiate level.

Education

- **Bachelor of Musical Arts - Composition (Brigham Young University-Idaho) - 2017**
- **Master of Music - Computer Music Composition (Peabody Conservatory of Music - 2020**

Awards

- The Judy Van Ostrom Award, Lighthouse International (Spring 2011)
- Winner of the 2014 Creative Works Competition in composition (2014)
